SUGGESTED ANSWER

As we – Dina, Doru, Matei and I – were soon to be staying too at the Postăvaru cabin/ chalet during the last week of the winter holiday, I reflected on the advantages and disadvantages of fog and of climbing uphill on foot. You never know what good a misfortune may bring. For the time being, however, we couldn't stay outside for long, as it grew dark quickly. We had plenty to occupy us: in winter, the order of the families' seven libraries, spread across different floors — one devoted exclusively to science (medicine, chemistry, mathematics) — was disturbed more often, as everyone chose whatever they liked.

That winter, soon after the first snowfall, grandfather read to us one of his favourite poems, but the sad endings upset us; in vain did he explain that, in fact, the ending with death was the right one, and that it would have been worse had Dan not died, because that would have implied something worse than death. No, death was acceptable to us only in those novels in which, in the following chapter, you discover/ed that the good hero had not actually died — only his enemies had believed so.
