A concert _____ the end of the school year.

SUBIECTUL B – INTEGRATED SKILLS (50 points)

- I. You are going to read an article about the benefits of team sports. Choose the answer (A, B, C or D) which you think fits best according to the text. (10 points)**

The Benefits of Team Sports

Participating in team sports offers numerous benefits for teenagers and young adults. Sports such as football, basketball, volleyball, and hockey not only improve physical fitness, coordination, and endurance but also teach important life skills that go beyond the playing field. One of the key advantages of team sports is the development of communication and cooperation skills. Players must learn to work together, share responsibilities, and support each other, which helps build friendships and a sense of belonging.

Another benefit is the opportunity to develop leadership and decision-making skills. Team members often take turns leading exercises or making strategic choices during games, which encourages responsibility and confidence. Additionally, regular practice and competition teach discipline and time management, as players must balance schoolwork, social life, and training schedules.

Team sports also have a positive impact on mental health. Being physically active releases endorphins, which help reduce stress and improve mood. Playing in a supportive team environment can also increase self-esteem and motivate teenagers to set personal goals. Furthermore, facing both victories and defeats in a controlled environment helps young people develop resilience and learn how to handle challenges.

However, it is important that competition remains healthy. Coaches and parents should encourage participation and effort rather than focusing solely on winning. Excessive pressure can lead to anxiety, frustration, or burnout, which may negatively affect both physical and mental well-being. When managed responsibly, team sports provide an enjoyable way to stay active, make new friends, and acquire skills that are useful in everyday life.

In conclusion, team sports are not just about physical activity; they are an important tool for personal development. They promote teamwork, leadership, and discipline while improving mental and physical health. Encouraging teenagers to participate in team sports can help them grow into confident, responsible, and socially aware adults.

1. Which of the following best explains why team sports help develop social skills?
 - A) They force players to follow strict rules without interacting
 - B) They require players to communicate, cooperate, and support one another
 - C) They allow players to focus only on their own performance
 - D) They encourage competition rather than teamwork
2. How does participation in team sports contribute to personal resilience?
 - A) By teaching players to always win
 - B) By exposing players to both victories and defeats in a supportive environment
 - C) By minimizing challenges and avoiding stress
 - D) By ensuring players do not need to work in groups
3. What is implied about the role of coaches and parents in team sports?
 - A) Their main responsibility is to guarantee the team always wins
 - B) They should create a supportive environment and avoid excessive pressure
 - C) They are not important for teenagers' personal development
 - D) They should focus only on physical training
4. Why might leadership experiences in team sports be valuable outside of sports?
 - A) Because they prepare individuals to make decisions, take responsibility, and guide others
 - B) Because they allow players to dominate their peers
 - C) Because they eliminate the need for academic skills
 - D) Because they guarantee immediate success in life
5. Which statement best summarizes the author's overall view of team sports?
 - A) Team sports are primarily about physical activity and winning games
 - B) Team sports are a tool for developing mental, social, and physical skills when managed responsibly
 - C) Team sports are too stressful and should be limited for teenagers
 - D) Individual sports provide more benefits than team sports

II. Imagine you have participated in or watched a team sport recently. Write a review of the sport. Your review should include:

1. Name of the sport and where you played or watched it.
2. A brief description of the game or the experience (e.g., rules, team size, duration, or key moments).
3. What you liked and what you found challenging about the sport.
4. How participating or watching the sport helped you or others improve physical fitness, teamwork, communication, or mental health.
5. Would you recommend this sport to others? Why or why not?

Write your review in 160 - 200 words. (50 points)
